## **ACKNOWLEDGEMENT**

We started this project as a part of our course curriculum. It gives us great pleasure to present the report of this project work conducted towards the fulfilment of the project titled “**Most Popular I T Companies in India**”.

We extend our special gratitude towards Dr. Suyog Amrutrao sir Head of Department of Management Science and Miss. Bhagyshri Kulkarni Project Guide who has been constant source of motivation, encouragement, and guidance that has gone long way in helping the completion of this project. We take this opportunity to thank those who have made the efforts in success of the project. We express our warm wishes to the entire staff members for their assistance and kind guidance who helped us out of all my queries.

We also heartily thankful to all our friends and “Live Life” for providing us all the useful requirements that were needed by us for the completion of project. Our thanks and appreciations also go to our colleague in developing the project and people who have willingly helped us out with their abilities

## **1.INTRODUCTION:**

This is the project report on Most Popular I T Companies in India. India is a worlds most IT export. India's IT industry is a dynamic hub, featuring major players like TCS, Infosys, and Wipro, excelling in software development and consulting. HCL, Tech Mahindra, and Persistent contribute significantly to global IT services. Accenture and Mphasis have strong Indian footholds, while companies like Mindtree and L&T Infotech specialize in digital transformation. India's IT sector is recognized for innovation, outsourcing expertise, and its role in global technology advancements.

We included some most popular IT Companies in India to this project those are TCS, Infosys, HCL, Mphasis, Accenture, Persistent, Tech Mahindra, L&T Infotech, Wipro. This project gives a basic information about this most popular IT Companies in India.

## 1.1 Existing System and need for existing System

The "existing system" typically refers to the current operational model or technology infrastructure in place before any proposed changes. While specific details about the existing systems of popular IT companies in India may not be publicly disclosed in great detail, we can discuss general aspects.

**Existing System:-** Established IT companies in India, such as Infosys, TCS, Wipro, and others, have robust existing systems that encompass a range of IT services, solutions, and client engagements.- These systems are built on years of industry experience, technological expertise, and a deep understanding of client requirements.

**Need for the Existing System:**

1. **Client Base:** The existing systems of these IT companies cater to a diverse and extensive client base across various industries globally. The systems are designed to meet the specific needs and challenges of these clients.
2. **Technology Infrastructure:** These companies have invested heavily in advanced technology infrastructure, including data centers, networks, and cybersecurity measures. This infrastructure forms the backbone of their operations, ensuring secure and efficient service delivery.
3. **Innovation and Adaptability:** The existing systems emphasize innovation, allowing companies to stay ahead in the rapidly evolving tech landscape. They are designed to be adaptable, incorporating emerging technologies to address changing client demands.
4. **Global Operations:** Considering the global nature of their operations, the existing systems are designed to facilitate seamless communication, collaboration, and project management across different regions and time zones.
5. **Compliance and Security:** Compliance with international standards and robust security measures are integral to the existing systems. This is crucial for maintaining the trust of clients and ensuring the confidentiality and integrity of sensitive information.
6. **Scalability:** The existing systems are designed to be scalable, allowing these companies to handle varying workloads and accommodate growth in client demands. Scalability is essential for maintaining efficiency and performance.

In summary, the existing systems of popular IT companies in India are comprehensive, technologically advanced, and tailored to meet the diverse needs of their global clientele. These systems are the result of continuous innovation, strategic investments, and a commitment to delivering high-quality IT services.

## 1.2 Scope of the work

The IT industry in India offers a multifaceted scope for professionals across diverse domains. In software development, individuals contribute to designing and maintaining applications that cater to a wide array of industries, driving technological advancements. IT consulting roles involve guiding businesses in formulating effective technology strategies and navigating digital transformations to enhance efficiency. The rising importance of data is met with opportunities in data analytics, where professionals analyze and interpret data for informed decision-making. The ever-evolving landscape of cybersecurity presents roles focused on safeguarding systems and data against a myriad of cyber threats. Cloud computing professionals are sought after for their expertise in architecture, deployment, and management of cloud solutions. The realms of artificial intelligence and machine learning see a surge in demand, with professionals developing algorithms and applications for automation. Mobile app development continues to be integral, creating and maintaining applications for smartphones and tablets. Blockchain technology professionals are engaged in implementing secure and transparent systems across various industries. The Internet of Things (IoT) sector provides opportunities to connect devices and systems, enabling data exchange and automation. Quality assurance (QA) professionals play a pivotal role in ensuring software and systems adhere to rigorous quality standards through comprehensive testing. Project management roles oversee the planning, execution, and successful delivery of IT projects. IT support and infrastructure professionals manage the backbone of technological operations, ensuring smooth system functioning. Digital marketing roles utilize online platforms for brand promotion and customer engagement. E-commerce opportunities abound in the online retail sector, involving the management of platforms and logistics. The industry's continuous evolution demands professionals with skills in emerging technologies, fostering innovation and growth.

### 1.3 Operating Environment-H/W, S/W

<b>Hardware:</b>		
SSD	:	512 GB
RAM	:	8 GB
Processor	:	11th Gen Intel(R) Core (TM) i3-1115G4 @ 3.00GHz 2.90 GHz
<b>Software:</b>		
Operating System	:	Windows 11
Browser	:	Internet Explorer, Google Chrome
Client-side Technology	:	CSS, HTML
Software	:	Subline-text, Notepad

### 1.4 Detail Description Of Technology used

#### Web Language:

1.Hypertext Markup Language or HTML: It is a Structural Language used to describe the structure of information on a webpage. The html file plays a couple of significant roles in a webpage. In Project HTML is used for Building Layout and Structure.

2. CSS: CSS stands for cascading style sheet. CSS is used for Style the Elements and Page components.

#### Software:

1. Notepad: Notepad: To write code in HTML & CSS code file.
2. Sublime text: To write code in HTML & CSS code file.

## **Chapter 2: PROPOSED SYSTEM**

In the proposed system this project include link for going next page as well as home page for easy visit the page inserted images for showing the IT Industry in India.

Inserting images for showing the IT Companies in India & together give the knowledge about the development and growth of the industry.

Objective of system:

To promote and introduce the most popular IT companies in the India.

To Provide search facility of the industry

To promote understanding the IT industry in India.

To give quite knowledge about the Indian IT industry.

### **2.3 User Requirement**

- Subline Test

- Notepad

### **2.4 Feasibility Study**

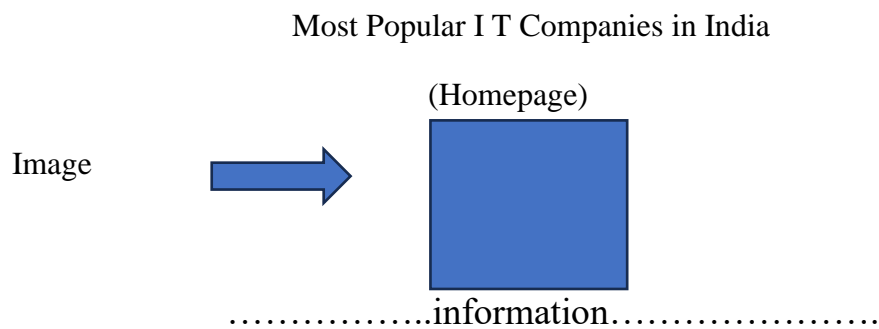

A feasibility study of a department of management sciences offering both MBA (Master of Business Administration) and MCA (Master of Computer Applications) programs would typically involve assessing various factors to determine the viability and potential success of such a department. Here are some key considerations:

**Market Demand:** Evaluate the demand for MBA and MCA programs in the target region or industry. Conduct market research to understand the number of prospective students, their preferences, and the potential competition from other educational institutions.

**Target Audience:** Identify the target audience for the MBA and MCA programs. Determine whether there is a sufficient number of students interested in pursuing both business

## **4 USER MANUA:**

### **4.1 User manual:**

The User Manual contains all the essential information for the user to make a complete use of this Popular I T Companies in India website. The main. purpose of the User Manual is to help the users to get all the required information on the subject that the user guide is on. Every user can get the step by step understanding of the online registration form from this User Manual.

Click on the website.

Then click on the link on the homepage of the page you want to navigate

After going on the requested page click the link of next page to go on the next page or click the link of go to homepage to on the homepage.

Operational Manual:

This system provides information, linking.

The proposed system does not included all famous places in India.

### **4.2 Operational Manual:**

This system provides information, linking

## **5. Limitations of the System:**

The proposed system does not included all IT companies in India.

It does not provide more information about companies.

Does not provide proper information about the all companies.

## **6.Future Enhancement:**

We will include the all the famous IT companies in India in the proposed system.

By using the css we will improve the designing of the system.

By using the google search engine for more information

We can add some more vedios of Particular IT companies.

We can add the reference of the IT companies.

## **7. Conclusion:**

Conclusion IT sector is a major driver of economic growth globally. India's IT industry is experiencing a strong period of growth, IT sector is the reduced the unemployment in India.

## **9. Annexure:**

Description of technology and tools:

In this project we have used four types of computer software languages HTML, PHP, CSS & JavaScript.

This all project is created using Four Software's Notepad, Sublime Text and and for Checking we have used Chrome Browser.

Software Languages: HTML, CSS

Web Language - Hypertext markup language, or HTML is a Structural Language used to describe their work with collaborating with each other. In Project HTML is used for Building Layout and

Structure, CSS is used for Styling the all elements and Fonts & Images and is Used

### **Hardware Requirements:**

- CPU
- Monitor
- Key-Board
- Mouse
- Network Connection

### **Software Requirements:**

- Sublime text
- Notepad
- Chrome Browse

## 5 L&T Infotech:

[L&T Infotech](#)

● ● ● ● ●

L&T Infotech, now known as LTI (Larsen & Toubro Infotech), is an Indian multinational IT services and solutions company. L&T Infotech was founded in 1997 as the technology arm of Larsen & Toubro Limited, a prominent engineering and construction company in India. It is headquartered in Mumbai, Maharashtra, India, and has a global presence with offices in several countries. LTI offers a wide range of IT services, including software development, system integration, cloud computing, and cybersecurity. The company has a diverse client base across industries such as banking, financial services, insurance, manufacturing, and healthcare. LTI is known for its focus on innovation and has established research and development centers to stay at the forefront of technology. The company has a strong commitment to sustainability and corporate social responsibility, engaging in various initiatives for community development. L&T Infotech is listed on the Bombay Stock Exchange and the National Stock Exchange of India. As of my knowledge cutoff in January 2022, the company had over 35,000 employees globally. LTI has received numerous awards for its excellence in IT services and corporate governance. The company's offerings include digital transformation, analytics, artificial intelligence, and Internet of Things (IoT) solutions. LTI has strategic partnerships with leading technology providers to enhance its service offerings and capabilities. It operates delivery centers and offices in North America, Europe, Asia-Pacific, and the Middle East. LTI has been recognized for its workplace culture and is considered one of the top employers in the IT industry. The company's leadership team is focused on driving growth and ensuring customer satisfaction. LTI's financial performance reflects its stability and growth in the competitive IT services sector. The company places a strong emphasis on talent development and provides training programs for its employees. L&T Infotech has been involved in various digital initiatives, contributing to the digital transformation journey of its clients. The company continues to evolve in the dynamic IT landscape, adapting to emerging technologies and market trends.
